## *Education and training*

**1986**

### **Degree in Medicine and Surgery**

The locoregional treatment of colorectal hepatic metastases. - Marks 110 over 110 cum laude

University of Genoa Medical School - Genova - IT

**1991**

### **Specialization in General Surgery**

Results of Laparoscopic Cholecystectomy - Marks fifty over fifty

University of Genoa Medical School - Genova - IT

**1995**

### **Specialization in Science of Nutrition**

Outcome of Biliopancreatic Diversion in Subjects with Prader-Willi Syndrome - Marks fifty over fifty cum laude

University of Genoa Medical School - Genova - IT

## *Academic experience*

**2020 - ONGOING**

### **Full Professor of Surgery**

University of Genoa - Genova - IT

Chief of 'Chirurgia 2' Unit Department of Surgical Science and integrated Diagnostics (DISC) University of Genoa

**2013 - 2020**

### **Associate Professor of Surgery**

University of Genoa

Chief of 'Minimal Access and Metabolic Surgery Unit' Department of Surgical Science and integrated Diagnostics (DISC) University of Genoa

## *Work experience*

**2010 - 2013**

### **Chief of Obesity Surgery Unit**

University of Genoa Medical School - Genova - IT

2013 - 2022

**Chief of Minimal Access and Metabolic Surgery Unit**

University of Genoa Medical School - Genova - IT

2022 - ONGOING

**Chief of Chirurgia 2 Unit Department of Surgical Science and integrated Diagnostics (DISC) University of Genoa**

University of Genoa Medical School

More than 5804 operation performed 3707 mininvasive operations 2457 advanced minivasive operations (287 on the esophagus 886 on the stomach and 965 on the colon and rectum)

***Language skills***

Proficient

***Research interests***

Between 1986 and 1991 Professor Camerini has been initially involved in the study of vascular access in chronic hemodialytic patient and of enteral and parenteral nutrition in surgical patient, then in the study of hyperthermic isolated regional perfusions for the treatment of extremities and liver tumors.

In 1991 Professor Camerini began his experience in Minimally Invasive Surgery, becoming in few years the most expert surgeon, in this field, in the University of Genoa. The first laparoscopic operations for achalasia, reflux, hernia, idiopathic thrombocytopenia purpura (ITP) and colorectal tumors in University of Genoa were performed by Professor Camerini.

However, among the different scientific and clinical interests, he has especially devoted himself to the field of surgical treatment of obesity. He has been involved in the above field during the last 15 years studying the many different technical, functional and clinical aspects of the gastric banding, vertical banded gastroplasty, biliopancreatic diversion and gastric bypass.

The first laparoscopic standard BPD was performed by Professor Camerini on April 2000. He also performs laparoscopic gastric bypass, with the aim of defining its possible indications as an alternative to BPD.

Since 2006 he has been involved in the study of the surgical treatment of the intestinal endometriosis and of type 2 diabetes.

Professor Camerini published 90 international papers, cited on PubMed, on the aforesaid subjects (total I.F. 376, total citations 2925, H-Index 28, according to Scopus).
