Brief Summary of Relevant Clinical Research Experience:

Clara Malattia, is a paediatric rheumatologist and Associate Professor of paediatrics at the University of Genoa, Italy. She works in the Department of Paediatrics Rheumatology of Istituto Giannina Gaslini in Genoa, a “EULAR Centre of Excellence in Rheumatology” for what concern paediatric

rheumatic disorders. Her research focus is imaging in chronic rheumatic diseases of the childhood. In particular, one of her research interests is the development and validation of imaging scoring systems to assess the overall disease activity and damage in the joints of children affected by juvenile idiopathic arthritis. She has published original researches which have contributed to demonstrate the substantial role of modern imaging modalities, such as MRI and ultrasound, in optimizing the management of patients with juvenile idiopathic arthritis.

Clara Malattia was Co-Chairman of the European League Against Rheumatism (EULAR)-Pediatric Rheumatology European Society (PReS) Task Force that was convened to produce recommendations on the use of imaging in the diagnosis and management of juvenile idiopathic arthritis. She is member of the Outcome Measure Rheumatoid Arthritis Clinical Trials (OMERACT) US in Juvenile Idiopathic Arthritis Special Interest Group. She has collaborated with the European Federation of Societies for Ultrasound in Medicine and Biology (EFSUMB) Task Force that has recently developed the Guidelines and Recommendations for Musculoskeletal Ultrasound. She was a member of the European League Against Rheumatism (EULAR) Task Force that was convened to produce recommendations for the use of imaging to guide interventional procedures in patients with rheumatic and musculoskeletal diseases (RMDs). She is member of the steering committee of Ped-MUS, a global international educational initiative aiming to implement the use of ultrasonography into clinical practice. She is co-founder of the Italian Pediatric Ultrasound in Rheumatology group, a national initiative aiming to implement the use of ultrasonography in the assessment of patients with chronic rheumatic diseases. Since 2013 to date she has been a lecturer and organizer of International and National Musculoskeletal Ultrasound courses.

She also has vast experience in the conduction of clinical trials related to childhood rheumatic diseases.
