CURRICULUM VITAE - FILIPPO ANSALDI

Filippo Ansaldi, MD

Nationality: Italian
Date of birth: October 14th, 1968
Email: filippo.ansaldi@unige.it

Professional Profile

Full Professor of Public Health with a background that spans epidemiology, healthcare management, and health system governance. Over the years, I have worked across academia, clinical settings, and public institutions, including senior executive roles within the Regional Health Service. My research output includes more than 220 peer-reviewed publications, with consistent international impact.

Current Positions

- **Full Professor of Hygiene and Public Health (MED/42)**, University of Genoa, Department of Health Sciences (since Dec 2018)
- **Director**, Unit of Health Planning, Epidemiology and Prevention, IRCCS Policlinico San Martino / A.Li.Sa., Genoa (since Nov 2017)
- **Director**, Regional Department of Epidemiology, Public Health and Health Data Analysis IRCCS San Martino Hospital, Genoa (since Nov 2025)
- **Director**, Postgraduate School/School od Specialization in Hygiene and Public Health, University of Genoa (since 2026)

Previous Key Positions

- **Chief Executive Officer (General Director)**, Azienda Ligure Sanitaria (A.Li.Sa.), Genoa (2021–2025); A.Li.Sa was the regional health governance body responsible for planning, coordination, and oversight of the Regional Health Service (SSR).
- **Director**, Department of Prevention, Planning and Control, A.Li.Sa., Genoa (2020–2021)
- **Associate Professor of Public Health**, University of Genoa (2009–2018)
- **Medical Director and Researcher**, IRCCS San Martino Hospital, Genoa (2005–2014)
- **University Researcher**, University of Genoa and University of Trieste (2000–2009)

Research Interests

My work focuses on epidemiology and public health, with particular attention to infectious disease surveillance, vaccination strategies, and prevention policies.
I am also interested in healthcare organization and system performance, including the design and evaluation of innovative models of care. My research combines clinical and field studies with health data analysis, aiming to assess interventions in terms of effectiveness, efficiency, and population impact.
I have authored over 220 publications indexed in Scopus (H-index 45; >6,800 citations).

Education and Training

- Advanced training in Healthcare Management and Organization (postgraduate courses and master programs)
