Researcher/Assistant Professor

University of Genoa

Research interests

She has taken part in studies conducted within the framework of national projects on issues of Hygiene and Public Health funded by the Italian Ministry of Education, Universities and Research, by the Italian Ministry of Health etc.

The main lines of research concern the issues of :

1) Hospital hygiene: epidemiological surveillance, assessment and management of microbiological and chemical-physical risk in the hospital environment;

evaluation of the hospital water quality both from the microbiological (Legionella, Pseudomonas etc) and chemical-physical point of view; epidemiology and management of *Healthcare-associated infections* (HAI) etc

2) food hygiene

3) exposure to environmental pollutants (chemical, physical and biological) assessment in the environment (indoor and outdoor).
