SHORT BIO

Dr Simone Battista, physiotherapist, PhD, is a research fellow in Neurosciences at the University of Genova, Genova, Italy. His main area of research revolves around the study and the treatment of rheumatic and musculoskeletal diseases. Specifically, he is interested in understanding how to improve patients' adherence to lifestyle interventions (e.g., exercise and diet) and how patients' socioeconomic, cultural and psychological factors can jeopardise their care. He has authored 21 scientific papers in the last three years, all published in impact journals and participated as a speaker in oral and poster presentations in 15 congresses worldwide.
