Personal skills and competences

Other language(s)

English level B2

Organisational skills and competences

- **Clinical Risk Management in Obstetrics:**

Proven experience in day-to-day clinical risk management in obstetrics, with a specific focus on complication prevention and continuous monitoring of patient conditions. Real-time management of non-conformities, with application of immediate corrective actions to ensure the safety of the patient and newborn during the birth process.

- **Clinical Risk and Good Practice Training:**

Proven track record in teaching and raising awareness regarding clinical risk, promoting the adoption of good practices among healthcare personnel, particularly in high-risk situations. Support in the design and implementation of training programmes on clinical risk, with a focus on maternal and child safety and the implementation of operational protocols in obstetrics.

- **Monitoring of Procedures and Compliance with Guidelines:**

Ability to monitor the implementation of guidelines and safety protocols for obstetric care. Oversee adherence to clinical practices to minimise risks related to complications during delivery and other critical phases of care. Management of day-to-day issues related to quality of care, with proposals for improvement.

- **Direct management of non-conformities and corrective actions:**

Experience in managing non-conformity situations in obstetrics, with prompt application of corrective actions to resolve problems in real time. Reporting and root cause analysis, helping to prevent similar issues from recurring in the future.

- **Care Quality Monitoring and Outcome Analysis:**

Ability to assess the quality of obstetric care and analyse patient care outcomes to ensure safety standards are met. Data collection and feedback to improve work processes and propose evidence-based corrective actions.

Technical skills and competences specifically related to the job description

1 Management of Complications and Emergency Situations:

In-depth knowledge of techniques for managing obstetric complications, such as preterm delivery, management of haemorrhage and infection, as well as other

emerging issues that require immediate intervention to ensure the safety of mother and baby. Experience in intervening quickly in emergency situations, minimising health risks to the patient.

- **Support in Maternal and Child Condition Monitoring:**

Experience in continuous monitoring and assessment of patients' clinical conditions during the birth pathway. Use of diagnostic tools to promptly identify any problems, with a focus on the safety and well-being of the patient and newborn.

- **Collaboration with the Healthcare Team and Care Coordination:**

Even without coordination experience, I collaborated continuously with the multidisciplinary team (doctors, nurses, neonatologists) to ensure an integrated approach in obstetric care. Communication activities and support in defining care plans for patients, focusing on clinical risk management and safety during the various phases of care.

- **Patient Education and Counseling on Obstetrical Safety:**

Ability to provide clear and accurate information to patients regarding clinical risk, potential complications and best care practices. Supporting patients and their families by explaining safety protocols and addressing their concerns, promoting a culture of prevention.

- **Use of Risk Management Tools and Obstetrical Technologies:**

Skills in the use of specific technologies for obstetric emergency management and clinical risk prevention, such as electronic fetal monitoring and other diagnostic tools. Experience in the adoption of technologies to improve the effectiveness of care and safety during delivery.

Capacity and cil monitoring of patients' conditions. Ability to correctly update and maintain documentation forms Computer skills

1 Clinical Risk Information Systems Management:

Excellent proficiency in the use of and IT applications specific to clinical risk management, documentation of care activities and and IT to ensure regulatory compliance.

- **Reporting and Monitoring of Care Processes:**

Experience in using IT tools for recording, reporting and analysing data related to quality of care and adverse events. Implementation of solutions for continuous clinical risk monitoring, contributing to the collection of useful data to improve processes and safety.

I believe I possess excellent interpersonal skills, accuracy in carrying out assigned tasks, responsible, conscientious with a collaborative and cooperative spirit.
