**TECHNICAL SKILLS AND COMPETENCES
WITH PARTICULAR REGARD TO THOSE RELAT-
ED TO THE TASK AT HAND**

My master's degree training has enabled me to

- acquire knowledge of EBN research tools and their adaptation to local realities;
- skills for both qualitative and quantitative research;
- ability to formulate objectives, according to the corporate mission, define indicators, monitor and analyse care outcomes through the use of tools aimed at MCQA;
- use of tools for the external analysis of needs and internal analysis of resources for the planning and implementation of organisational management models based on midwifery in compliance with the recommendations and regulations in force;
- structuring and validation of new analysis tools for the continuous improvement of care quality;
- structuring of PDTA and Integrated Care Pathways
- Identification of the underlying training needs to bridge the gap between the skills possessed and those required to achieve the objectives defined within the specific clinical care process;
- basic computer skills office package for the processing of data collected with the multidisciplinary team;
- consultation of databases of major professional interest
- ability to learn quickly about the use of new technologies and/or programmes

OTHER SKILLS AND COMPETENCES

Capacity to manage labour and delivery in water;
Analysis of processes, identification of criticalities through the use of the most commonly used tools in the CAR and organisational solution proposals;
Organisation and management of single- and multi-professional meetings
Elaboration of procedures and work instructions

2012

FURTHER EXPERIENCE

Master's traineeship for coordination functions at an international evangelical hospital in the field of organisation and human resources management;

2018

1st year Master's Degree in Nursing and Midwifery Sciences internship at Policlinico S. Martino, area: application and implementation of the new computerised nursing record Trakcare

2019

2nd year CLM internship carried out at DISSAL: learning skills for the translation and validation of a tool for the assessment of adherence to best practice in midwifery in the context of physiological pregnancy, review of medical records and identification of strategies for the MCQ.

LICENCE(S)

B driving licence

FURTHER INFORMATION

Qualitative and quantitative research skills, LG quality assessment through the application of assessment tools (e.g. AGREE II) with analysis skills for guideline adaptation and implementation in the work context

RESEARCH INTERESTS**MAIN INTERESTS:**

Nursing sensitive outcomes (NSO): represented by the quantity- and quality-sensitive outcomes of care closely linked to nursing practices and skill-mix and translated into detectable impacts using international indicators

led midwifery care: underlying the identification of care models for low-risk obstetric pregnancy (BRO) and tools for the evaluation of the outcome; research in which my Master's thesis was developed
