- On 30.12.2010 assigned a highly specialized role "Management of the cardiological patient."
- From 15.03.2012 to present, responsible for the Simple Structure "Monitored beds in Emergency Medicine" (assignment suspended from 10.10.2019 to 10.04.2020).
- From 01.09.2020 to 23.09.2021 Acting Director of the S.C. Emergency/Urgency Medicine of the S.Andrea Hospital in La Spezia.
- From 24.06.2021 to the present Director of S.C. Emergency/Urgent Medicine of the S.Andrea Hospital in La Spezia.

The Emergency Medicine structure has availability of 18 beds divided into: 10 beds dedicated to Emergency Medicine and 8 to Short Intensive Observation. The Emergency Medicine has a sub-intensive characterization with 8 beds equipped with centralized multiparametric monitoring; it deals with all pathologies with acute characteristics that require ventilatory support and vasopressor therapies. In these beds, patients with high clinical instability suffering from acute pathologies predominantly of a cardio-respiratory type are cared for, requiring close clinical and instrumental monitoring. The structure has 5 devices for non-invasive ventilation with all available device/patient interfaces. On average, about 1000 patients/year are discharged from Emergency Medicine with an average length of stay of about 4 days. In the same structure, part of the patients in Short Intensive Observation (OBI) is managed.
