## *Research interests*

Anna Maria Stagno is associate professor in Methodologies of the Archaeological Research at the University of Genova, where she teaches rural and post-medieval archaeology, as well as landscape archaeology and history of material culture. PhD in historical geography and rural archaeology, she has done research at the University of Durham (IAS fellow), and at the University of the Basque Country (as Marie Curie fellow 2014-2017), focusing her research on the archaeology of commons and on the jurisdictional meaning of action and practices and, thus, of the archaeological evidence. Her research is focused on the dialogue between disciplines and her methodological approach to the historical study of European rural societies combines archaeological, archaeobotanical and archival investigation. Her research interests are the historical systems of environmental resources management, with particular reference to sharing practices, commons and heritagisation processes, emphasizing the role of historical studies in the planning and construction of a sustainable future for European rural areas. Her scientific production includes monographs (The spaces of rural archeology, publisher All'Insegna del Giglio), edited books, papers in scientific journals permanently at the top of international rankings (such as World Archeology, European Journal of Postclassical Archaeologies, Quaderni storico etc.), and book chapters in collective volumes of prestigious publishing houses (publishers Routledge, Archaeopress, Il Mulino, Carocci, Giuffrè, etc.) and a constant commitment to dissemination also through the organization and participation in national and international conferences and seminars, as well as talks in invited conferences and workshops.

She is the coordinator of the Laboratory of Environmental Archaeology and History, cir Dafist-Distav) at the University of Genova and the PI of the ERC Stg 2019 project "ANTIGONE – Archaeology of sharing practices. The marginalisation of European mountains (18th–21st)" and of the Doctoral Programme CLOE (MSCA cofud DP) focused on the topics of the construction of a sustainable development and conservation of European mountain starting from historical, environmental and juridical perspectives, as well as of other research projects.
