WORK EXPERIENCE

01/10/2020 – NOW

Associate Professor

University of Genoa - Dipartimento di Scienze della Terra, dell'Ambiente e della Vita (DISTAV).

sector Physiology 05/D1; BIO/09

01/10/2017 – 30/09/2020

Temporary researcher (art. 24 c.3-b L. 240/10)

University of Genoa - Dipartimento di Scienze della Terra, dell'Ambiente e della Vita (DISTAV).

sector Physiology

01/10/2011 - 30/9/2017

Temporary researcher (art.1 c.14 L. 230/05)

University of Genoa - Dipartimento di Scienze della Terra, dell'Ambiente e della Vita (DISTAV).

sector Physiology

01/03/2006 - 30/09/2011

Postdoc fellow

University of Genoa - Dipartimento di Scienze della Terra, dell'Ambiente e della Vita (DISTAV).

sector Physiology

03/03/2003 - 30/10/2005

Postdoc fellow

Istituto Cantonale di Microbiologia di Bellinzona e Laboratorio degli Ospedali Universitari di Ginevra, Svizzera

sector Microbiology

EDUCATION AND TRAINING

2006 - 2010

Master of Science in Human Pathology

University of Genoa

50/50 cum laude

2000- 2003

Ph.D. Biophysics

University of Genoa

1999

Master degree in Molecular Biology

University of Genoa

110/110 cum laude

- Tutor for more than 30 students degree both bachelor and master in Biology, Natural Sciences and Biotechnology.

Research topics

Elena Grasselli has a background in molecular biology, biophysics, microbiology, human pathology and physiology.

In the last 10 years Prof. Grasselli's research was focused in antioxidant power as well as other beneficial activities of several compounds of natural origin such as thyroid hormones, polyphenolic compounds, fucoidans, peptides. She also studied amphibian peptides by reviewing some biological activities and by evaluating wound healing power as well as anti-steatotic of some of them. In this light a database derived from other already available was built to analyze the aminoacidic composition frequency among all the known amphibian peptides.

Moreover the last 10 years are also characterized by the collaboration with Dr. Matteo Zanotti Russo (Angel Consulting) with the aim to develop research-based biological assays for evaluating safety and efficacy of active principle as well as cosmetic compounds. In this scenario she contributed to the scientific validation of a database (Toxtool), including information on more than 4000 cosmetic active principles and excipients. Recently the lab head by Prof. Grasselli is collaborating with Cosmetica Italia Servizi, the consulting company own by Italian cosmetic association.

As UniGe Responsible of the H2020 project EcoeFISHent, she is in charge for the upscaling of active principles for cosmetic and nutraceutical purpose to achieve the production of final cosmetic and nutraceutical products.

Currently Prof. Grasselli's lab is composed by 3 PhD students, a fellow and a post-doc.

Leadership/Participation to research projects

- 2021 Responsible of the PhD fellow funded by di Angel Consulting XXXVII cycle entitled Effects of estrogenic compounds on skin physiology.
- 2020 Responsible of operative unit UNIGE in the H2020 EcoeFISHent project "Demonstrable and

- replicable cluster implementing systemic solutions through multilevel circular value chains for eco-efficient valorization of fishing and fish industries side-streams".
- **2020** Member of operative unit UNIGE in the project POR FESR 2014-2020- board 1- Action 1.2.4- Poli di Ricerca e Innovazione acronym MERITI.
 - **2021** Responsible of the fund by Regione Liguria for the project in the setup for a method to detect the variants of SARS CoV-2, pathogens and emerging pollutants in the Ligurian's wastewater.
 - **2020** Responsible of research study 'Efficacy and security validation through the use of 3D tissue models of collagen extracted by green technology' funded by MICAMO s.r.l.
 - **2020** Responsible of PhD student funded by university spin-off MICAMO s.r.l. XXXVI cycle entitled 'Determination of benefic effect on skin physiology of natural molecules'.
 - **2020** Scientific responsible of technical-scientific collaboration agreement to the realization of environmental and molecular monitoring in the ligurian water.
 - **2017:** Italian Responsible for the project of the European Tender: "Mitigating a new infectious disease in Salamanders to counteract a loss of European biodoversity" reference ENV B.3/SER/2016/0028 coordinated by Ghent University (Belgio).
 - **2016:** participation of the project entitled "Monitoraggio delle specie di ambiente umido/acquatico" Finaced by dal Parco nazionale delle Cinque Terre; Contract number: 3052/2015 2013.
 - **2015:** participation of the project entitled "Monitoraggio delle specie di ambiente umido/acquatico" Finaced by dal Parco nazionale delle Cinque Terre; Contract number: 823/2015.
 - **2014:** Responsible of the project "Valutazione dello stress ossidativo nel sangue di pazienti affetti dalla Sindrome di Rett" financed by University of Genoa.
 - **2013:** participation of the project entitled "Studio di molecole naturali con possibile azione anti-steatosica ed antiossidante in sistemi *in vitro* di steatosi epatica" financed by University of Genoa.
 - **2012:** participation of the project entitled "Studio evolutivo delle risposte biomolecolari agli stimoli cellulari indotti da polveri di silice cristallina e asbesto negli invertebrati marini e nei mammiferi" financed by University of Genoa.
 - **2011:** participation of the project entitled "Attività immunomodulante di MSC umane: modulazione dell'espressione di molecole di adesione coinvolte nell'extravasazione linfocitaria" financed by University of Genoa .
 - **2008:** participation of the project entitled: "Omeostasi metabolica: meccanismi cellulari-molecolari ed aspetti fisiopatologici correlati al metabolismo lipidico"; financed by University Ministry: MIUR-COFIN 2008 (No. 20089SRS2X_002).
 - **2006:** participation of the project entitled: "Ruolo antisteatosico della 3,5-Diodo-L-tironina (T₂): studio 'in vitro' su colture di epatociti". financed by University Ministry:MIUR-COFIN 2006 (No. 2006051517_003).
 - **2003:** participation of the project entitled "Molecular epidemiology of antimicrobial resistance and virulence in *Escherichia coli* from animals and humans" (No. 4049-063270) financed by Swiss national science foundation.
 - **2000:** participation of the project entitled "Ingegnerizzazione del citocromo P450 in soluzione ed in film sottili verso una nuova generazione di componenti molecolare per i biosensori." finaced by National research council.
 - **2000:** participation of the project entitled "Espressione, purificazione e caratterizzazione strutturale della CK2 umana." finaced by National research council.
 - **2000:** responsible of the project entitled "Caratteristiche molecolari del Citocromo P450 2B4: struttura tridimensionale" financed by University of Genoa
