INTERPERSONAL SKILLS AND COMPETENCE.

- Strong aptitude for active listening and empathy, developed through both clinical psychiatric practice and individual and group psychotherapy.
- Excellent communication skills in multidisciplinary contexts, including in situations of conflict or high emotional intensity.
- Extensive experience in managing relationships with families, judicial institutions (forensic field), educational bodies and therapeutic communities.
- Empathic and motivational leadership, also developed as a coach of sports teams, with the ability to build cohesion, trust, and team spirit.

ORGANISATIONAL SKILLS AND COMPETENCES

- Coordination of multidisciplinary teams in complex clinical settings, including shift management, clinical goals and treatment protocols.
- Strategic leadership of a Department, with responsibilities including budget, performance indicators, staff training and interdepartmental projects.
- Experience in organising scientific events, university courses, postgraduate training and CME conferences in psychiatry and forensic fields.
- Planning and management of training programmes and technical strategies for amateur and semi-professional football teams.

TECHNICAL SKILLS AND COMPETENCES

- Advanced expertise in the diagnosis and treatment of major psychiatric disorders, following international guidelines (DSM-5, ICD-11).
- Experience in drafting forensic psychiatric reports and in court-appointed or party-appointed expert consultancy.
- Advanced skills in the use of psychodiagnostic tools and clinical tests (MMPI-2, WAIS, SCID-5).
- In-depth knowledge of software for electronic health records and hospital information systems.
- Skills in video analysis, scouting and athletic programming in the football field.

OTHER SKILLS AND COMPETENCES

- Ongoing training in psychotherapy (integrated, cognitive-behavioural, psychodynamic approaches).
- Knowledge of forensic and criminological topics applied to forensic psychiatry.
- Teaching and pedagogical skills, acquired through university lecturing and supervision of residents and students.
- Strong stress management and quick decision-making abilities, enhanced by experience in high-pressure clinical and sports environments.
- Passionate about sports and neuroscience applied to performance, with an interest in sports psychology and athletes' mental resilience.
