PhD in Methodology of Psychology (1993-1997, Angelo Cangelosi)

PhD in Psychology, Anthropology, and Cognitive Sciences (2009-2012)
PhD in Social Sciences (2016-ongoing)

Research interests

My research interests focus on various strands that can be placed, in general, in two major areas: one epistemological, historical and methodological and one on cognitive processes such as the psychology of thinking and cognitive models.

I have also dealt with issues concerning school and university guidance and school learning of science subjects.

Recently, my work has been devoted to the applications of cognitive psychology.
